NATURAL BRIDGE® LP Transverse Connectors

Innovative, low volume, and ultra low profile transverse connectors providing torsional stabilization in the thoracolumbar spine. Offered in adjustable and semi-adjustable designs for use with MESA® and DENALI® pedicle screw systems.

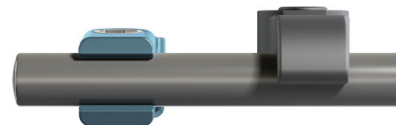

- Anatomical Implant Design
 - Low Volume
 - Low Profile
- Polyaxial Snap-On Heads
 - Ease of Introduction
 - Offers Tactile Feedback
 - 360° Range of Motion
- Single Screwdriver for All Adjustments
- Distinct Color-Coded Implants

Unmatched in Profile & Ease of Use

- Ultra low profile connectors seamlessly pair with MESA's no profile above the rod design
- Polyaxial heads snap onto rod allowing for ease of introduction while offering the surgeon tactile feedback when implanting

NATURAL BRIDGE LP Semi-Adjustable Connector

A Fixed Transverse Connector with a Twist

- Semi-adjustable design combines the rigid center body of a fixed connector with the polyaxial heads of an adjustable design, effectively removing any need for bending the connector prior to implantation
- Sizes ranging from 21 mm - 39 mm

NATURAL BRIDGE LP Adjustable Connector

Easy-to-See, Easy-to-Use

- Telescoping design ensures optimal fit, while distinct color-coded implants aid in identification
- Sizes ranging from 38 mm - 90 mm
