

**Jawz™**  
Endomyocardial  
Biopsy  
Forceps

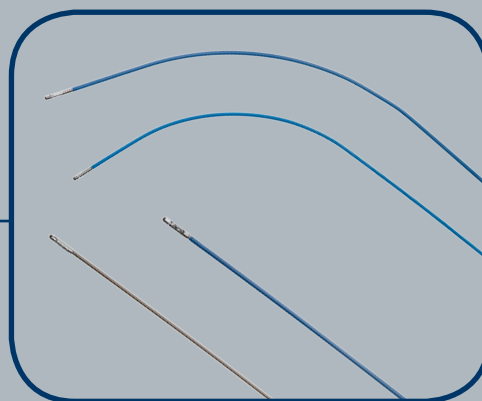

Clearly, a Cut Above

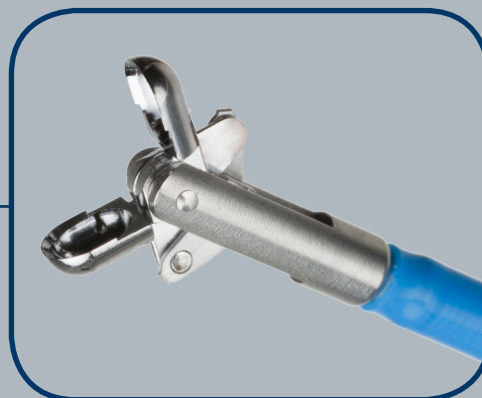

Three-ringed  
handle easily  
adapts to any  
thumb position

Pre-Curved,  
Maxi-Curve  
or Straight  
configurations

Proprietary  
alloy and  
unique cutting  
edge design

**Developed by transplant cardiologists  
for use by transplant cardiologists**

## **PRODUCT ADVANTAGES**

### **Handle**

- Three-ringed handle adapts to and maintains desired thumb position
- Precision molded to provide a solid “instrument” feel

### **Shaft**

- Available in Stainless Steel or PTFE Coated
- Available in Straight, PreCurved and MaxiCurved configurations to provide the best patient access
- Available in formable and non-formable configurations to best suit your desired technique

### **Cutting Head**

- Unique cutting edge design allows superior surface alignment to provide a clean cut
- Cutting jaws precision machined from a proprietary alloy to remain sharp throughout the procedure

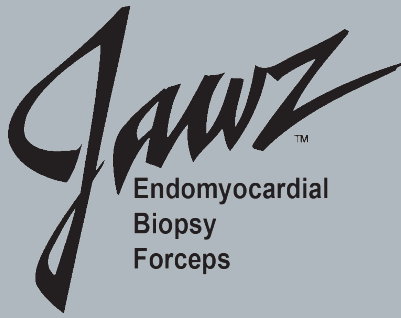

### **Safe**

- Single use, disposable unit eliminates the risk of contamination
